PRODUCTS FOR QUALITY WATER SERIES 255 SOFTENER

AUTOMATIC WATER CONDITIONER **You'll love it** **for all it provides...** **and prevents**

NATURALLY SMOOTH SKIN **SHINY SILKY HAIR**

Bathing and washing with conditioned water is a pleasure. Skin rinses completely clean, and stays soft and smooth. Shaving cream lubricates better for a closer shave.

SOFT BRIGHT CLOTHES

Laundry comes out cleaner in conditioned water. Fabrics look brighter, feel softer, smell fresher. Laundry detergents work better and your clothes last longer.

FRESH NATURAL FLAVORS

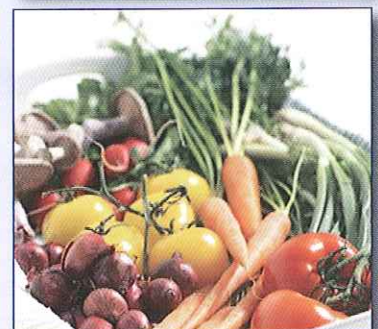

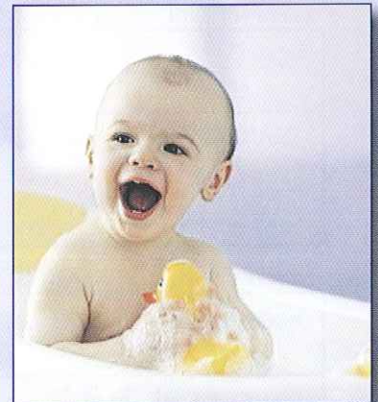

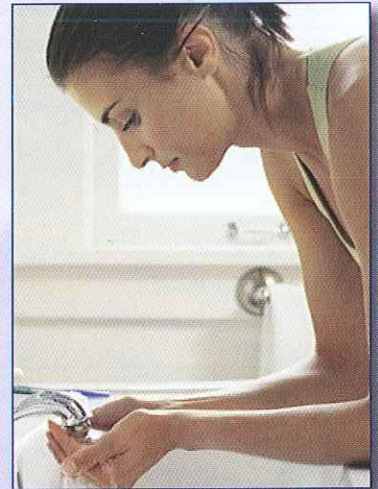

Savor flavors as they were meant to be enjoyed with the natural taste of conditioned water. Beverages, soups, foods, all taste fresher — even ice cubes are better because the iron and manganese are removed.

CLEAN, SPARKLING DISHES

Hot conditioned water cleans dishes, glassware and silverware completely.

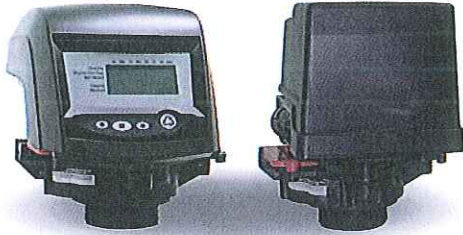

SUPER SAVINGS

Besides increasing their effectiveness, DWC softened water enables you to use less soap and detergent, saving the environment and saving you money. In addition, a DWC Softener prevents the build-up of harmful mineral scale, adding years to pipes, appliances and hot water heaters, paying for itself before you know it.

PRODUCTS FOR QUALITY WATER SERIES 255 SOFTENER

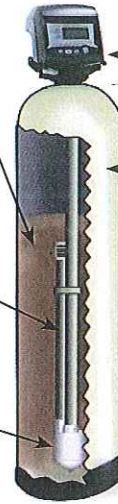

255/740i Logix time clock control valve featuring advanced electronics

255/440i Time clock control valve

High quality ion exchange resin
High capacity resin for use on chlorinated and non-chlorinated water.

High flow internal distributor
Piping is one inch O. D. to provide you with the highest flow rates.

Standard turbulator
Reduces iron pass-through. Available in 24K and 48K units.

Automatic controller
Available in calendar clock, metered and Logix advanced electronics models.

Sturdy fiberglass reinforced tank
Strong, non-corrosive tank prevents leaks.

Durable poly brine tank with safety float
Poly tank is non-corrosive for long life and the safety float for positive shut-off

Optional salt grid
Ensures complete free flow during brining cycle.

255/740i LOGIX TIME CLOCK CONTROL VALVE (FEATURING ADVANCED ELECTRONICS)

MODEL #	CATALOG #	CU.FT. RESIN	CAPACITY IN GRAINS				TANK SIZES		FLOW RATES IN GPM
			MAX/SALT	MIN/SALT	MINERAL	BRINE			
DWC 24 Logix	192323	.75	30K	12	16K	5	7 X 44	18 X 33	8-10
